

Visit Dinex at IAA» TRANSPORTATION 2026 September 14-20

going the extra mile

Hall 12 / Stand 12A24

All You Need From Turbo To Tailpipe

Dear Valued Customer,

We invite you to visit Dinex at **IAA 2026** and experience our innovative solutions firsthand.

As a trusted and agile provider of full-system exhaust and emission solutions for the OEM heavy-duty sector, Dinex is committed to addressing environmental challenges and meeting customer demands with agility. Our expert Sales and Engineering teams will be on-site, ready to discuss the latest advancements in renewable and low-carbon fuels, cost-efficient engineering, and future-proof emission compliance.

Explore how Dinex is supporting the industry transformation with a focus on:

Ready for Euro 7 / EPA 27 / BS 7 / CN 7, 2 stage SCR system

- Nominated Euro 7 system supplier
- Ultra-low deposit mixing devices
- State-of-the-art catalytic coatings

Join us at **IAA in Hannover, Hall 12 / Stand 12A24** and explore our latest innovations designed to support your future requirements. We encourage you to reach out already now to schedule a meeting with our team during the exhibition.

Innovative Hydrogen Aftertreatment Solutions

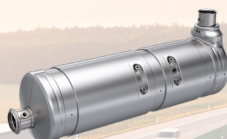

- Urea-free technology & near-zero tailpipe emissions
- Innovative canning & catalyst technologies such as NO_x storage catalyst (NSC)
- Cost-efficient solutions

In the meantime, all the best from the Dinex team!

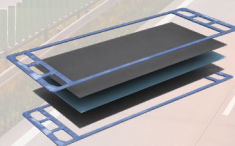

Aftertreatment Solutions for CNG Combustion Engines

- Significant PGM reduction for existing norms without compromising performance
- Future-ready TWC solutions with proven long-life durability
- Built-in NH₃ mitigation concept, no additional catalyst required

Membrane Electrode Assemblies for Hydrogen Technologies

- Tailored ink formulations and precision coatings
- Catalyst coated membranes (CCMs) or MEA-3 with low PGM loadings
- Customer specific gasketed CCMs or MEA-5

DiFlex™ – Leak-Tight Decoupling Element

- Deposit penetration protection
- Multilayer design, for best-in-class durability
- Flexible and customizable design concept
